Rectification Database

Presentation. I have chosen to present rectification results for nativities presented in *America is Born* (AIB) Appendix C in a supplement for several reasons. First is to allow presentation of photographs for individuals studied as physiognomy has taken on a greater role in my rectification style. In addition, inclusion of photos in a book introduces additional technical and financial costs which I did not feel worthy the expense. Second is to keep the page count and pricing of the book down to a reasonable figure.

Notation. This supplement uses the notation format for directions described in the Introduction to AIB.

Longevity. For deceased individuals, longevity analysis is presented in accordance with the hīlāj // al-kadukadah model presented in *A Rectification Manual: The American Presidency*. As a simplification in terminology, this supplement uses the phrase ‘giver of life’ for the *hilaj*; ‘giver of years’ for the *al-kadukadah*; and ‘Ruler of the Chart’ for the *Al-mubtazz Figurae*.

Birth Data

Of the following 43 horoscopes, Astrodatbank reports 11 B-rated or higher:

With two exceptions - J. P. Morgan and Henry Wallace - rectified birth times represent minor adjustments to reported data. For J. P. Morgan, the rectified birth time of 12:33:41 PM falls close to the 1:10 PM rectified time computed by J. P. Morgan’s private astrologer Evangeline Adams. This leaves the rectified time for Henry Wallace the single large departure from existing records.

The ‘n.a.’ notation indicates I have taken the reported birth times as given with no adjustments.

The 32 horoscopes presented have been rectified from scratch. Besides rectifications for Presidents James Madison and Calvin Coolidge which can be found in *A Rectification Manual*, details for all remaining horoscopes are presented here.

Distributor: Mercury/Capricorn. Isaiah Thomas - Proposed Ascendant: 24AQ34'06''

Comment. With Thomas' 12th house Mercury and Sun in Capricorn placed in the 11th of politics by Alchabitius houses, further rectification tests can be based on events concerning Federalist friends timed by directions of Mercury and Sun to the angles. (See Madison and Hamilton examples below).

Physiognomy. Pronounced development of the upper forehead is a typical Aquarian quality. Third decan of Aquarius rising makes Venus the decan ruler. Venus/Sagittarius is consistent with dimples and somewhat fat lips.

TR	South Node 1PI10 conj. Part of Accusation, Exile, and Injury 1PI12	16-Apr-1775
----	--	-------------

On this day Thomas was forced to evacuate his printing operations from Boston to Worcester in order to evade seizure and destruction from the British. Thomas participated in the Battle of Lexington & Concord on 19-Apr-1775.

D	Mars/Scorpio	P	dex. sextile Mercury (l=0) c. → MC	3-May-1787
D	Mars/Scorpio	P	dex. sextile Mercury (l=ME) c. → MC	18-Jul-1787

This is a high probability primary direction sequence which times James Madison's arrival in Philadelphia for the Constitutional Convention on May 3 (exact) and the Great Compromise made on July 16 (error=2 days).

D	Venus/Capricorn	P	conj Sun d. → MC	2-Oct-1789
---	-----------------	---	------------------	------------

Alexander Hamilton was appointed Treasury Secretary on 11-Sep-1789. This is a close match and is indicative of the way Thomas' Mercury and Sun directions may be read through others.

D	Venus/Virgo	P	Vertex (l=ME) d. → opposition Mercury	4-Aug-1810
---	-------------	---	---------------------------------------	------------

Published *The History of Printing in America*, 14-Aug-1810.

Death: April 4, 1831. Lived 82y 2m 24d.

Thomas lived just past Venus' 82 major years. This is a good example of a planet closely conjunct an angle which overrides all other choices for the giver of years. But why does Venus conjunct the MC give 82 years instead of Jupiter conjunct the Ascendant giving his 79 major years? Don't know.

D	Saturn/Gemini	P	trine Jupiter (l=JU) d. → ASC	18-Apr-1831
---	---------------	---	-------------------------------	-------------

Saturn (40) and Jupiter (37) are the two high scoring killers. On April 4, 1831, see tr Saturn 25LE18 and c.s.a. Saturn 25LE13 closely conjunct the 7th cusp. For the 1831 solar return, see a triple conjunction of Sun, Venus, and Jupiter in the 1st with the Moon separating from Venus and applying to Jupiter. Venus rules the 8th of death in the natal; Jupiter is the second high scoring killing planet.

Jupiter/Capricorn: Alexander Hamilton - Proposed Ascendant: 19TA53'46"

The year of Hamilton's birth is disputed with 1755 and 1757 offered. Both figures emphasize Capricorn which matches a philosophy of power lodged within a centralized national government.

1755. Capricorn stellium: Mercury, Moon, Saturn, Sun, Venus. Mercury and the Sun are common to January 11 figures cast for both years. Delineating Moon/Capricorn as 'need for government,' Saturn/Capricorn as 'building walls to maintain government,' and Venus/Capricorn as 'love of government,' matches Hamilton's obsession with creation of a centralized national government for the new American Republic. Configuration of Venus to the Sun merits attention. Venus-retrograde approaching her inferior conjunction is a relatively rare phenomenon. 'Like a moth to a flame,' the combust Venus entices Hamilton to engage in scandalous behavior and matches the Reynolds affairs.

1757. Capricorn stellium: Mercury, Mars, and the Sun. Inclusion of Mars distinguishes this year from 1755. As is detailed in AIB Chapter 6, Mars/Capricorn disputes the validity of a centralized government; this placement in the figure of James Madison captured Madison's anti-Federalist stance. Because Hamilton is pro-Federalist, Mars/Capricorn in the 1757 raises questions.

SA	d.s.a. Sun conj MC	10-Oct-1772
----	--------------------	-------------

Hamilton's 'Hurricane letter' published on 3-Oct-1772 was a major life event. It attracted a financial sponsor for Hamilton's emigration to America.

D	Jupiter/Scorpio	P	dex. sextile Sun (l=0) c. → Mars	12-Aug-1793
---	-----------------	---	----------------------------------	-------------

Yellow fever and recovery; August 1793.

D	Mars/Pisces	P	sin. sextile Venus (l=VE) d. → MC	3-May-1797
D	Mars/Pisces	P	sin. sextile Venus (l=0) d. → MC	5-Jun-1799

Timed revelation of secret letters from the Reynolds scandal of 1792 made public on 5-Jul-1797 and his father's death on 3-Jun-1799. (Venus rules the 11th, or 8th from the 4th, death of father).

Longevity: 49y 6m 0d. Died 12-Jul-1804. Gunshot wound from duel fought July 11.

Figure is diurnal and Sun in the 9th house of her joy is the giver of life. Sun is conjunct Saturn who as giver of years grants 57 years. Though oriental, Saturn is still combust and some years must be deducted for the combust condition though the rules are vague on this type of adjustment. Best to leave the projection at 57 years. Another indication of a short life is Ascendant ruler Venus combust.

D	Mercury/Taurus	P	opp. POF (l=0) c. → Mars	24-Mar-1804
D	Mercury/Taurus	P	opp. POF (l=MA) c. → Mars	11-Jul-1804

Aaron Burr lost the New York gubernatorial race in the spring of 1804. This triggered a dispute between Burr and Hamilton which ultimately led to Hamilton's duel with Aaron Burr on 11-Jul-1804.

Venus/Capricorn: John Jay - Proposed Ascendant: 15PI32'03''

Mars/Capricorn/11th signifies anti-Federalists who impede Jay's own political organizations:

SA	d.s.a. Mars conj ASC	4-Jun-1791
SA	c.s.a. ASC conj Mars	12-Oct-1791

Corresponded to Jefferson and Madison's travels through New England during May and June 1791 in order to develop an anti-Federalist coalition. At the urging of Jefferson and Madison, Philip Freneau founded the anti-Federalist *National Gazette* newspaper on 13-Oct-1791; first published issue, 31-Oct-1791.

SA	d.s.a. Mars square MC	6-Feb-1798
SA	c.s.a. MC square Mars	22-Jul-1798

President John Adams informed Congress that American ships had been attacked by the French on 5-Feb-1798; caused anti-Federalist uprising. Anti-Federalist sentiments peaked in early July with Congressional action to rescind treaties with France on 7-Jul-1798. This date is sometimes used to date the start of what historians refer to as the Quasi-War with France (1798-1800).

Saturn/Libra/8th ruling the 11th signifies political alliances designed to regulate investments in traded goods through a balanced legal approach.

D	Jupiter/Leo	P	dex. square POF (l=SA) c. → Saturn	24-Apr-1793

D	Mars/Scorpio	P	POF (l=0) d. → Moon	1-Mar-1796
---	--------------	---	---------------------	------------

Jay Treaty went into force, 29-Feb-1796.

Longevity: 83y 5m 4d. Died 17-May-1829.

Figure is diurnal and Sun in the 10th qualifies as the giver of life. Arguably with the Sun's close conjunction to the MC, the Sun usurps all other candidates for the giver of years. Sun grants his major 120 years; Square from Nodes deducts 25%; leaving a net of 90 years. He lives short of this projection. Consider also Jupiter as the Ruler of the Chart. Actual lifespan is just past Jupiter's 79 major years.

SA	d.s.a. Sun conj ASC	14-Jun-1829
----	---------------------	-------------

Death falls four weeks prior to this solar arc measurement. In addition consider the directed POF at the time of death at 25CP54 was only 6 minutes (or six weeks) from the changeover from the bound of Saturn to the bound of Mars.¹ Direction of any hylegical point from one malefic to another is secondary testimony for death.

¹Directing the POF through the Bounds computed with Placidus V. NK 4.1 using the Placidus under the Pole Navigator. Given the slight differences between Placidus under the Pole and Ptolemy's method of primary directions, it would be interesting to see if the changeover was more precisely timed with Ptolemy's method. I leave this for future study.

Distributor: Saturn/Capricorn. John Marshall - Proposed Ascendant: 16AQ56'58"

D	Venus/Pisces	P	sin. square MC (l=0) d. → Saturn	5-Dec-1787
D	Venus/Pisces	P	sin. square MC (l=SA) d. → Saturn	24-Mar-1788

Kicked off by Marshall's 13-Dec-1787 maneuvering to avoid Patrick Henry's insistence for a second convention and continues to Marshall's 20-Jun-1788 address to the Virginia legislature which swung delegates towards ratification.

Longevity: 79y 9m 11d. Died 6-Jul-1835. Health started to fail in Spring 1831 at age 75y 5m.

Figure is diurnal. Sun in 9th house of joy qualifies as the giver of life. Taking Saturn as the giver of years poses problems as it is difficult to make the necessary adjustments to Saturn's major 57 years to approximate Marshall's actual longevity. Better to take Venus, Ruler of the Chart, as the giver of life. Though in detriment, Venus is in generosity with Mercury and is favorably besieged between the North Node and Jupiter. Assume Venus gives her 82 major years; North Node augments by 25%; Saturn receives Venus by triplicity and deducts his 30 minor years. Net projection is 72.5 which is within 3 years of when Marshall's health faltered.

D	Jupiter/Taurus	P	sin. square ASC (l=0) d. → Saturn	6-Jul-1835
---	----------------	---	-----------------------------------	------------

High scoring killing planet is Mercury. In the 1834 solar return prior to death, Mercury makes his return which is by definition conjunct the Sun. Marshall died on 6-Jul-1835, just seven days after his son Thomas died from a collapsed chimney struck by lightning on 29-Jun-1835. Saturn/Capricorn/retro is consistent with a chimney collapse.

Distributor: Mercury/Aquarius. John Elihu Hall - Proposed Ascendant: 14SA50'12"

This is a very speculative rectification based on limited data.

Jan-1808. First issue of *American Law Journal* - to 1817

As suggested in *AIB* Chapter 6, publication of the *American Law Journal* corresponds to Hall's major Jupiter Fidaria period from 1802 to 1815. This is not an exact match, but the years leading up to the start of the Jupiter-Saturn subperiod on April 10, 1814 correspond to the active period of Mercury/Aquarius as Ascendant Distributor for the nation as a whole. Natal Jupiter 5AQ47 falls in the bound of Mercury/Aquarius which links Hall to the Mercury/Aquarius Distribution.

---	--	-------------

Hall was attacked by a mob on this date.

Longevity: 45y 5m 15. Died 12-Jun-1829.

Figure is nocturnal. Moon is preferred as the giver of life and allowable in the 3rd except for the fact that she does not aspect any valid candidates for the giver of years. Empirical giver of life appears the Part of Fortune with Saturn ruling the POF by exaltation in his own sign of rulership the logical giver of years. Saturn is also the Ruler of the Chart.

Saturn grants his 57 major years; square from Mars deducts one-third of his 15 minor years because mars receives Saturn in Capricorn by exaltation. Net projection is 52 years. He lived fewer years.

Distributor: Venus/Aquarius. John Calhoun - Proposed Ascendant: 5SC14'19"

Physiognomy

Later photographs depict Calhoun's face as tense with bulging eyes, giving an appearance of someone about to explode. Ascendant features first decan of Scorpio assigned to Mars. Natal Mars/Taurus signifies pent up anger which is held for long periods of time until a trigger causes an explosion. This is a delineation match to Calhoun's appearance.

These two solar arcs form a quasi-sequence which captures the events of the disputed election of 1824 starting with William Crawford's caucus nomination on 14-Feb-1824 and culminating with Andrew Jackson's 9-Feb-1825 defeat in the House of Representatives.

Longevity: 68y 0m 11d. Died 30-Mar-1850, tuberculosis.

Figure is nocturnal and Moon angular in the 7th is an acceptable giver of life. Moon in Taurus, sign of her exaltation, raises the possibility that the Moon trumps all other candidates as the giver of years. Should the Moon give 108 major years, then arguably Mercury deducts 20 minor years by sextile (as an accidental malefic). This leaves a net projection of 88 yrs. Too long. Consider then Saturn as the giver of years because Saturn is the bound ruler of the Moon. Saturn gives his 57 major years. Jupiter is conjunct Saturn by antisecia and adds his 12 minor years and his 79 major years as days because Jupiter does not receive Saturn. Net projection is 69y 79d which is a close match to actual longevity.

D	Mars/Pisces	P	sin. square Jupiter (l=0) c. → Moon	2-Apr-1850
---	-------------	---	-------------------------------------	------------

D	Saturn/Taurus	P	Moon (l=MO) d. → Mercury	28-Mar-1850
---	---------------	---	--------------------------	-------------

Killers are Mars (42), Venus (34), and Saturn (32). On the day of death, there was an exact Mercury return and Jupiter at 15VI26 squared the antisecia of the Part of Death 14CP20 within a few minutes of degree. For the 1850 solar return prior to death, Moon separates from Mercury and applies to Saturn. Mercury rules the natal 8th and Saturn is the third high scoring killer.

Distributor: Jupiter/Aquarius. DeWitt Clinton - Proposed Ascendant: 2SA13'04''

Physiognomy

Decan ruler Jupiter/Scorpio is a match to the prominent aquiline nose, a classic Scorpio feature.

Measurements

Clinton's first wife Maria Franklin died on 30-Jul-1818 from weakness after the birth of her 10th child. See that Mars rules the 5th (children) and 12th (death of children) by sign and the 2nd (death of wife) by exaltation. This connects the affairs of children to the death of Clinton's wife.

Both Moon and Jupiter primary direction sequences time Clinton's 8-Oct-1823 opening ceremony of a canal section which linked to the Hudson River. Clinton used this event as a publicity tool to resuscitate his political career; he was re-elected NY Governor the following year.

Death: 58y 11m 10d. Died February 11, 1828.

Figure is nocturnal and Moon angular in the 1st would normally qualify as an acceptable giver of life. In this case, conjunction to the North Node rules out the Moon. Though Sun/Pisces/4th is the next logical candidate to consider, it appears the Part of Fortune is the empirical giver of life. For the Part of Fortune, bound ruler Jupiter is in his own bound and squares the Part. Jupiter is the giver of years and grants 79 years. Saturn aspects by a wide trine but does not receive Jupiter so Saturn cannot deduct years. Mercury trines but does not receive Jupiter. Only if Mercury is allowed to deduct his 20 minor years is a solution of 79 – 20 – 59 years found. Consider that Mercury may deduct years only because Jupiter is the high scoring killing planet in the figure and Jupiter receives Mercury.

The second transit corresponds to Johnson's August 26, 1808 rejoinder to the Jefferson administration which attacked Johnson after Johnson's May 28 ruling. The third transit corresponds to Treasury Secretary Gallatin's 24-Nov-1808 observation that Johnson was correct in his ruling. (For a discussion, see Morgan, Chapter 4). Suppose Jupiter grants his 79 major years. By conjunction, Mars deducts his 15 minor years, leaving a net of 64. This is reasonably close. To reach this conclusion one has to ignore the opposition from Saturn (outside moiety of orb) and the conjunction to Mercury which is arguably an accidental malefic because of his configuration with Mars (by conjunction) and Saturn (by rulership).

Wilkes’ reputation as leader of the Ex. Ex. was permanently damaged by what most of his crew considered were excessive and brutal punishments. Wilkes order of the public flogging of three men in Hawaii on October 31, 1840 (flogged 110 times each with a cat-o’-nine-tails while tied to a gallows mounted on a boat and towed alongside each ship in the squadron so all could view the punishment) was one of the most notorious incidents which was linked to the first of a series of court marshals starting 25-Jul-1842 after the Ex. Ex. returned. The second sequence times Wilkes’ own court marshal which started 17-Aug-1842 which resulted in a public reprimand on 22-Sep-1842 for illegally flogging sailors and marines. In the position of the Sun, bound ruler Saturn is in his exaltation, angular, and aspects the Sun by trine. Saturn grants his 57 major years. Also consider Saturn's position near the MC; wider than Bonatti's recommended orb, Saturn may still override all other candidates for the giver of years. Sequence timed Trist’s initial problems with General Winfield Scott. Trist wrote his wife on 20-May-1847 stating Scott was intolerable, selfish, and vain, and requested his wife show the letter to President Buchanan. In writing to Trist on 29-May-1847, Scott recovered from his first impulses to return the ‘farrago of impudence, conceit, and arrogance to the author’ once he realized that Trist was genuinely interested in a treaty and not in usurping Scott’s military command (Arthur, pp. 148-151). As the sequence closed, Trist argued with Army authorities over his right to remain in Mexico, resulting in Trist’s arrest (April/May 1848) as a forcible method of ensuring Trist’s return to America. Figure is nocturnal and Moon is preferred, yet placement in the same sign as the South Node raises questions. Empirical arcus vitae supports the Moon as the giver of life. Moon’s triplicity ruler Jupiter is in exaltation and aspects the Moon by square; however, Mars within 4 degrees of the Ascendant appears to trump Jupiter as giver of years. If Mars, then Mars grants his 66 major years. Venus sextiles and receives Mars; she adds years. How many? If she adds only her 8 minor years, then $66 + 8 = 74$ => accurate. Though Venus is in the sign of her rulership, Saturn falls in the antiscion of Venus and may account why Venus does not add her middle years as months.

Configuration of Chart

In addition to his role in the Young America Movement, Nicholas Sanders is of interest to historians for his possible role in a Confederate plot to assassinate Lincoln, a theory which has gained credence recently. Is Sanders' figure consistent with the alleged role of Sanders in Lincoln's assassination plot? Yes for three reasons. Mars/Aries is placed in the degree of the Sun's exaltation. This is harmful for the King, especially since Mars is placed near the IC by quadrant houses and in the 5th of political assassination by whole sign houses. Mars rules the 12th of covert operations. Moon's separation from Saturn and application to Mars emphasizes the power of Mars in the figure. Finally, for the smoking gun which ties Sanders to the assassin Booth, see the Sun-Venus primary direction sequence below.

Biographer Reynolds broaches the sensitive subject of Whitman's abrupt halt to his teaching career on Long Island following the years 1836-1840. He concludes that on 3-Jan-1841, Whitman was run out of town following a sermon which made public charges of indecent behavior towards young men, presumably residents of homes where Whitman lodged and with whom he shared sleeping quarters. Neptune in the 9th of religion is a delineation match to a church scandal.

After finding him relatively unharmed, Whitman left New York and moved to Washington where he volunteered as a nurse in army hospitals. One product of this stint was a NYT piece entitled 'The Great Army of the Sick' published 26-Feb-1863. All features of the Moon's configuration fit this event: A search for the status (or end-of-the-matter - Moon in 4th) for his brother (Moon rules 3rd); found masses of wounded soldiers (Mars/Aries in 12th of confinement augmented by the North Node); eventually left them behind (Moon separates from Mars); wrote about it and garnered publicity (Moon/Leo ruling 3rd of publicity). Sun+Moon/Aquarius/11th signifies Stephen's early political association with the Whig Party which advocated Henry Clay's American system, including canal transportation. Stephens was also a friend of Lincoln. As time progressed Stephens adopted more strident views favoring slavery and broke with his early political alliances. This break is consistent with Sun in the bound of Mars/Aquarius sextile Mars/Aries. Sun placed in the bound of a malefic which aspects the Sun is one indication of enmity towards the father. In this case; political figures. Note: Lincoln's Sun = 23AQ19.⁵

Placement of Mars/Aries in the Ascendant is consistent with facial stabbing and slashing wounds Stephens suffered during September 1848.

Released from military prison on 13-Oct-1865. Jupiter rules the 12th of confinement.

Longevity: 71y 0m 21d. Died 4-Mar-1883. Stephens was in poor health for most of his life, weighing 96 pounds. He died following injuries suffered after a gate fell on top of his body.

Figure is diurnal and Sun in the 11th qualifies as the giver of life. Bound ruler Mars is in the sign of his rulership, in the Ascendant, and aspects the Sun by trine. Mars is the giver of years and grants his 66 major years. North Node conjunct Mars by antiscia within 12 degrees adds 25% for a gross of 82.5 years. Saturn/Capricorn deducts only one-third of his 30 minor years. Net projection is 72.5 years. Accurate.

Configuration of Chart

Ascendant falling in the bound of Mars/Leo and Descendant falling in the bound of Saturn/Aquarius establishes the polarity between Vallandigham's Mars/Leo-signified States Rights philosophy and the Saturn/Aquarius signified Abolition movement. Yet Vallandigham was a pacifist. Why?

- Saturn/Aries/9th signifies a philosophy based on the obstruction of war.
- Mars/Virgo is diminished by conjunction to the South Node. The weakened War God ruling the 9th of philosophy also diminished the importance of bloodshed as a philosophical tenet.
- Jupiter/Pisces signifies a philosophy of compassion and forgiveness. It is a classic placement of Christian pacifism.

Moon/Aries in the 9th house of pilgrimage ruling the 12th of confinement signifies banishment. Following Vallandigham's banishment by Lincoln on 17-May-1863, Vallandigham was escorted to the Confederate line at Murfreesboro, Tennessee on 25-May-1863. Longevity: 50y 10m 18d. Died 17-Jun-1871 of self-inflicted gunshot in hotel.

This is an unusual case of an accidental death. Vallandigham was a lawyer defending an individual accused of murder during a barroom brawl. Vallandigham believed the murder victim had accidentally shot himself while rising from a kneeling position during the brawl and intended to demonstrate this scenario with an unloaded gun to his colleagues before repeating the demonstration in the courtroom. Unfortunately, the gun was loaded and Vallandigham shot himself on June 16 and died the following day. The defendant was cleared of murder charges.

Figure is diurnal and Sun/Leo/1st serves double duty as giver of life and giver of years. Sun grants his 120 major years. Sun applies to trine of Saturn; Saturn receives the Sun by triplicity and deducts his 30 minor years. Net projection is 90 years. Native lives fewer years. Mars is conjunct the Part of Life 20VI34 within 4 degrees; this shortens life.

D	Mars/Scorpio	P	sin. square Sun (l=MA) d. → Mars	16-Jun-1871
---	--------------	---	----------------------------------	-------------

Mars is the high scoring killer. This direction times the exact day of the gunshot wound.
