

Errata – *A Rectification Manual* – 11 September 2008

For books printed after 14 March 2008.

Please note that all purchasers of the eBook edition of *A Rectification Manual* will receive a revised copy of the text at no charge. Estimated delivery: Nov. 2008.

Special thanks to readers which have pointed out these errors.

Page 201

Third paragraph. Replace 'Lincoln's affair' with 'Jefferson's affair.'

Page 450

Replace

7 Aug 1827 – 18 Aug 1827 – 9 Mar 1829. *d. Venus conj. Moon*
24 June 1831. *c. Moon trine Saturn, lat=Saturn, error = 10 days*

With

9 Aug 1827 – 16 Aug 1827 – 8 Mar 1829. *d. Venus conj. Moon*
26 June 1831. *c. Moon trine Saturn, lat=Saturn, error = 8 days*

Page 454

Replace

14 April 1819 – 31 Oct 1819. d. Mercury sextile ASC

With

14 April 1819 – 31 Oct 1819. d. Mercury sextile MC

Page 652

Omit the following direction

13 June 2004. c. Moon square North Node, lat=zero, error = 8 days

Errata – *A Rectification Manual* – 11 September 2008 - Continued

First Ladies Database – the following errors appear to have arisen from one of the final edits which was mistakenly omitted from the text. There are no changes to the proposed rectified times nor are there any changes to supporting directions. In some cases, the Trial Ascendant listed does not match the natal figure shown.

Page 670

Trial Ascendant is correct. Natal figure should show birth time of **3:42:00 AM**

Page 672

Trial Ascendant is correct. Natal figure should show birth time of **5:28:59 PM**

Page 676

Trial Ascendant is correct. Natal figure should show birth time of **10:30:01 AM**

Page 687

First line should read 10 September **1842**.

Page 701

Arcus Vitae calculated date should read 16 July **1882**.

Page 717

Al-kadukhadah paragraph. Fourth line. should read: “The Venus-Mercury-Jupiter stellium **sextile** adds minor years and as...”

Page 738

Chart correct as shown. Trial Ascendant should read **29TA48’06”**

Page 740

Chart correct as shown. Trial Ascendant should read **19AQ35’45”**

Page 748

Trial Ascendant is correct. Natal figure should show birth time of **4:13:39 PM**

Page 758

Chart correct as shown. Trial Ascendant should read **5LE49’33”**

Errata – *A Rectification Manual* –

For books printed between before 14 March 2008

Page xiv.

Added to final section **Notation for Directions**

‘Presentation. Directions are listed with the promittor first, significator second. PLEASE NOTE ! for converse directions, the order is reversed. The significator is presented first, promittor second. This convention is utilized by Janus 3.0 and is maintained here for the convenience of Janus 3.0 owners.’

Page 33

Table 3. Andrew Jackson’s death corrected to **8** June 1845. Relevant measurements in table adjusted accordingly. There is no change to the text’s conclusion about the relative merits of the Alchabitius house system.

Page 38, lines 7-9 replaced with:

‘The following three sets of directions, both direct and converse, list selected Saturn-angle directions.’

Table in middle of page, 3rd row:

‘c. Saturn opposed MC, 25 April 1762, 17 December 1762’

Replaced with

‘**d.** Saturn opposed MC, 25 April 1762, 17 December 1762’

Page 203

This formula was incorrectly computed under the assumption that Nixon’s natal chart was diurnal. It is nocturnal.

For ease of presentation, I have recreated the entire page here for those who wish to cut and paste it directly in the book. (See next page).

Page 462, line 3.

Andrew Jackson’s death corrected to **8** June 1845.

Other

There were about half a dozen minor spelling and grammatical changes made for clarity which are not listed here.

Errata for **page 203**.

Arabic Part Calculation Example: Richard Nixon

Name of Part	Formula	Sect	Part	Antiscion
P. Death of Siblings	MC – Sun + ASC	Yes	21AR08	8VI52

Step 1. Calculate Arabic Parts based on *natal* figures, presented in Appendices C and D. Each of the following examples displays natal Arabic Part calculations and a Solar Return figure. Though Bonatti indicates a second set of Arabic Parts can be calculated from the solar return, this is *not* the procedure followed here.

Step 2. Convert zodiacal degrees of each component to a 360 degree scale.

Item	Position	360 Degree Conversion
MC	10GE15	70deg 15min
Sun	19CP23	289deg 23min
ASC	12VI00	162deg 00min

Step 3. Determine whether a sect adjustment is required.

Nixon's figure is nocturnal. Sect adjustments are a consideration for nocturnal figures. If the Sect box is marked YES (which is the case here) reverse the first two components in the formula; e.g., revised formula = Sun – MC + ASC.

Step 4. Compute the formula.

For this step, first calculate Sun - MC. Next add this difference to the Ascendant.

$$[\text{Sun} - \text{MC}] + \text{ASC} =$$

$$[289\text{deg } 23\text{min} - 70\text{deg } 15\text{min}] + 162\text{deg } 00\text{min} =$$

$$219\text{deg } 08\text{min} + 162\text{deg } 00\text{min} = 381\text{deg } 08\text{min} // \text{subtract } 360\text{deg} // 21\text{deg } 08\text{min}$$

Part of Death of Siblings = **21AR08**

Antiscion of Part of Death of Siblings = **8VI52**

Special Note: Be careful to add or subtract degrees if the 0 Aries Point is crossed. An adjustment of 360 degrees may be required. Example ~ Compute the distance from 20 Pisces to 10 Aries. 20 Pisces is 350 degrees; 10 Aries is 10 degrees. 10deg – 350deg is a negative number. Need to add 360deg to the terminal point 10 Aries before making the subtraction. (10deg + 360deg) – 350deg = 20 degrees.
