Medieval Astrology Profile for Marie Curie

File History: Initial; 13-Sep-2016

Introduction to delineation of appearance and character in natal astrology. The following document is a hand-written analysis of **Marie Curie**, using the principles of medieval predictive astrology. The discipline of natal astrology focuses on the fate of an individual based on a horoscope cast for the moment of birth. Within natal astrology, the 1st house occupying the eastern horizon at birth describes the native: physical vitality, appearance, and character. Between the Hellenistic and Medieval eras several specialized models were developed to assess these characteristics. They include **longevity** (vitality and length of life), **physiognomy** (form and shape of the face and body), **victor of the chart** (overall life purpose), **manners** (social conduct including ethical behavior), and **temperament** (elemental mix of fire, earth, air, and water with applications in medical astrology). Prior research has presented models and results for longevity (*A Rectification Manual: The American Presidency*, Chapter 4) and physiognomy (*Astrological Physiognomy: History and Sources* & *Astrological Physiognomy: Empirical Tests of the Leo Rising Decan*).

Victor of the Chart. Included are two competing models for computing the victor of the chart said to be the single most powerful planet in the horoscope. According to Plato's follower Porphyry, by configuration in the natal horoscope the planet signifying the victor of the chart shows the life choice made by the soul prior to incarnation. Plato explains the details of his soul model in *The Myth of Er* found in the closing pages of his work *The Republic*. Porphyry and his peer Antiochus offer specific rules for determining the victor of the chart. The method of Antiochus/Porphyry is compared to a later method for determining the victor suggested by the Jewish Rabbi Abraham ben Meir ibn Ezra, a philosopher and astrologer active in the 12th century. For a discussion of these two models, see the companion paper *Victor of the Chart: Testing Methods of Antiochus/Porphyry and Ibn Ezra*, which serves as a key to what is presented here.

Manners. Plato was not alone among Greek philosophers in conceiving models for the soul. Aristotle's model of vegetative, sensitive, and intellective soul levels (assigned respectively to the plant, animal, and human kingdoms) was taken up by Ptolemy, who found a correspondence between the sensitive and intellective soul and Moon and Mercury in the natal horoscope. Configuration of the Moon and Mercury, with special emphasis given to their rulers, is a second method for analyzing the soul. Ptolemy introduces this model in *Tetrabiblos III.13* "Of the Quality of the Soul.*"* Subsequent authors refer to this model as "Significators of the Soul" or "Manners." A summary template for the Moon and Mercury is presented in the paper and will be further developed in future versions.

Marie Curie (November 7, 1867 – July 4, 1934)

Marie Curie was a Polish and naturalized-French physicist and chemist who conducted pioneering research on radioactivity. She was the first woman to win a Nobel Prize, the first person and only woman to win twice, the only person to win twice in multiple sciences, and was part of the Curie family legacy of five Nobel Prizes. She was also the first woman to become a professor at the University of Paris, and in 1995 became the first woman to be entombed on her own merits in the Panthéon in Paris.

She was born in Warsaw, in what was then the Kingdom of Poland, part of the Russian Empire. She studied at Warsaw's clandestine Floating University and began her practical scientific training in Warsaw. In 1891, aged 24, she followed her older sister Bronisława to study in Paris, where she earned her higher degrees and conducted her subsequent scientific work. She shared the 1903 Nobel Prize in Physics with her husband Pierre Curie and with physicist Henri Becquerel. She won the 1911 Nobel Prize in Chemistry.

Her achievements included the development of the theory of *radioactivity* (a term that she coined), techniques for isolating radioactive isotopes, and the discovery of two elements, polonium and radium. Under her direction, the world's first studies were conducted into the treatment of neoplasms, using radioactive isotopes. She founded the Curie Institutes in Paris and in Warsaw, which remain major centres of medical research today. During World War I, she established the first military field radiological centres.

While a French citizen, Marie Skłodowska Curie (she used both surnames) never lost her sense of Polish identity. She taught her daughters the Polish language and took them on visits to Poland. She named the first chemical element that she discovered—polonium, which she isolated in 1898—after her native country.

Curie died in 1934, aged 66, at a sanatorium in Sancellemoz (Haute-Savoie), France, due to aplastic anemia brought on by exposure to radiation while carrying test tubes of radium in her pockets during research, and in the course of her service in World War I mobile X-ray units that she had set up.

Rectification

Available Birth Data

Astrodatabank presents an AA-rated 12 Noon birth time with an Ascendant of 12CP02. The proposed rectification is 13 minutes earlier and maintains the Capricorn Ascendant.

Proposed Rectification

Marie Curie
7-Nov-1867
11:47:28 AM
LMT -01:24:00
Warsaw, Poland
21e00'00"
52n15'00"
ASC 8CP41'51"

<u>Stage I. Determine the Ascendant sign</u>

One of the first thing to consider bout Curie's horoscope is identifying the astrological symbolism for the element radium which she discovered. From a traditional standpoint, the correct point of view is to consider Curie a modern alchemist whose heated vats of pitchblende are analogous to chemical experiments performed by medieval alchemists. In medieval times, elements were reduced in the search for gold. Curie reduced huge quantities of pitchblende for a few particles of radium. Both processes are the same and involve heat (Mars) and reduction (Saturn). Curie's horoscope features a Sun-Saturn-Venus-Mars Scorpio stellium in 10th / 11th QS/WH houses. In addition, Mars/Scorpio is placed in the bound of Saturn/Scorpio with bound lord Saturn occupying the same (its own) bound. Both victor models, confirmed by matching events to the Firdaria sequence, favor Mars as victor.

Firdaria

Nearly all major life events are timed by Mars Firdaria subperiods for the diurnal series:
Mercury-Mars (Earned Sorbonne physics degree, Rontgen's photo spurs radiation research).
Moon-Mars (Miscarraige, defended PhD thesis, awarded Nobel Prize).
Saturn-Mars (Denied membership in Academy of Sciences, awarded 2nd Nobel Prize).
Jupiter-Mars (US tour, awarded National Institute of Social Sciences Gold medal).

Moon's Configuration

Except for 7:11 AM (sunrise) to 8:03 AM (the Moon's trine aspect to the Sun), for the balance of daylight hours the Moon separates from the Sun and applies to Saturn. As the significator for scientific research, Saturn as the target of the Moon's application makes sense. But this step only confirms that Curie's horoscope is diurnal, albeit by eliminating about an hour just after sunrise from consideration. This delineation step will not help to confirm the Ascendant sign; it only confirms that most diurnal hours are appropriate for an allowable birth time range.

Configuration of the Chart

Based on Goldsmith's biography, there is only one notable configuration which is consistent with the stated birth time and Capricorn Ascendant. Lot of Fortune 10TA29 conjunct the IC and in the 5th WS house is a delineation match to help from her father in learning math and physics. By 5th WS placement Lot of Fortune is a match to her daughter Irene who assisted Marie in research, later as Director of Warsaw's Curie Institute of Oncology. Lord Venus/Scorpio/11th ruling the 5th suggests an alliance (11th) with one of her female (Venus) children (5th) which matches Irene's role.

Conclusion: Evidence so far is consistent with Capricorn rising. Perhaps not overwhelming but reasonable nonetheless.

<u>Stage II. Determine the Ascendant's range within 1-4 degrees</u>

Sensitive Degrees

The following two transits of Nodes to the angles helped to anchor the rectification:

26-Dec-1898. Announced discovery of radium. trNorth Node 8CP47 conj ASC.
24-Jan-1911. Lost membership vote to Academy of Sciences. trSouth Node 15SC11 conj MC.

Note: Later the same year when she was awarded the Nobel Prize for chemistry on 7-Nov-1911, the South Node had 'just' moved out of Scorpio into Libra with a position of 29LI59 for the Nobel announcement.

Lots

Lot of Marriage.	21LE49/8TA11
Lot of Marriage of Women a/c Hermes.	8CP24/21SA36

For the tragic accidental death of her husband Pierre, killed in a carriage accident which crushed his skull on 19-Apr-1906 there are three pertinent measurements:

(1) dsa Mars 8CP31 conj 2nd marriage lot
(2) tr. South Node 17AQ23 within a degree of the 2nd house cusp (death of spouse)
(3) In the 1905 solar return figure, Mercury 29SC56 rules the 2nd and is placed on the 7th cusp with solar return Mercury partile conjunct natal Mars.

© Copyright 2016. Regulus Astrology LLC. All Rights Reserved.

Stage III. Determine the exact Degree and Minute of the Ascendant

Solar Arc Directions

The most promising solar arc directions are the set of ASC-Sun directions in 1903 which timed her Phd thesis defense and 1st Nobel award and another set in 1921-1922 which timed her trip to the United States where she received widespread acclaim and professional recognition.

23-Apr-1903. *dsa ASC sq Sun*
27-Nov-1903. *csa Sun sq ASC*
Defended PhD thesis, 1st woman in France to achieve this level, June-1903.
Marie, husband Pierre, and Henri Becquerel win Nobel Prize for physics, Nov-1903.

26-Mar-1921. *dsa Sun conj ASC* ****KEY****
17-Jul-1922. *csa ASC conj Sun*
National Institute of Social Sciences awards its gold medal to Curie, 26-Mar-1921.
President Warren Harding presented Curie with gram of radium, 20-May-1921.
No event match found for 2nd direction.

9-Jul-1934. *dsa ASC conj Moon*
27-Jun-1936. *csa Moon conj ASC*
Death, 4-Jul-1934.

Primary Directions

REG	D	Mercury/Taurus	P	Lot of Fortune d. => Moon (0)	16-Sep-1897

Birth of daughter Irene, 12-Sep-1897.

REG	D	Jupiter/Capricorn	P	ASC c. => Jupiter (JU)	26-Feb-1906
PT	D	Jupiter/Capricorn	P	ASC c. => Jupiter (00)	25-Aug-1906

PT	D	Jupiter/Taurus	P	IC d. => Moon (MO)	8-Apr-1906
PT	D	Jupiter/Taurus	P	IC d. => Moon (0)	14-Jul-1906

Besides the measurements listed in Stage II for the accidental death of her husband Pierre on 19-Apr-1906, these two sets of directions are also at work. For the ASC-Jupiter directions, note that Jupiter is placed in the 2nd house, or 8th from the 7th, husband's death. For the IC-Moon directions, note that the Moon rules the 7th of the spouse and the Moon's direction to the 4th house cusp signifies the end-of-the-matter. The IC-Moon direction is also consistent with permanent emotional scars. Biographer Goldsmith states: "With Pierre's death Marie irrevocably closed to the world. Never again would there be a sign of joy" (p. 136).

© Copyright 2016. Regulus Astrology LLC. All Rights Reserved.

PT	D	Jupiter/Capricorn	P	ASC d. => Mars (MA)	8-Feb-1911
PT	D	Jupiter/Capricorn	P	ASC d. => Mars (0)	28-Feb-1911
REG	D	Jupiter/Capricorn	P	ASC d. => Mars (MA)	18-Nov-1911
REG	D	Jupiter/Capricorn	P	ASC d. => Mars (0)	13-Jan-1912

Lost membership vote for Academy of Sciences, 24-Jan-1911.
Nobel Prize for Chemistry announced, 7-Nov-1911.
Attended Nobel Prize ceremony, 10-Dec-1911
Physical (kidney ailment) and mental collapse, suicide plans, late Dec-1911

With Mars/Scorpio/11th the significator of Curie's alchemy used for radium research, we should expect to see strife, awards, alliances, and some physical stress as both Mars and the Sun are in the same sign. We see all of these events with strife manifesting as the 'no' membership vote of 24-Jan-1911 after Curie's intimate relationship with the married Paul Langevin made Curie a 'homewrecker' in the eyes of conservative Academy members. The better significator of these critics is most likely Saturn/Scorpio in the same sign with Saturn-ASC solar arcs of 23-Sep-1910 and 3-Aug-1911 (not listed) likely timers of censure from Academy members about the relationship. The latter 3-Aug-1911 Saturn-ASC solar arc overlaps with the primary directions listed above making it difficult to determine what is causing what.

REG	D	Saturn/Aquarius	P	sin square Saturn (0) c. => Lot of Fortune	9-Jul-1933
REG	D	Saturn/Aquarius	P	sin square Saturn (SA) c. => Lot of Fortune	25-Jun-1994

Medical illness – large gallstone, 1933 (no exact date found).
Death, 4-Jul-1934.

PT	D	Mercury/Scorpio	P	Sun d. => DSC	13-Nov-1934

Death, 4-Jul-1934.
This is the best theoretical arcus vitae. If so, the rectification is slightly off.
Consider also the Moon directed to the Ascendant by solar arc which is another classic arcus vitae.

Model Summary

(for model details see www.regulus-astrology.com/research.html)

Physiognomy

Ascendant sign: Capricorn
Ascendant sign ruler: Saturn/Scorpio
Ascendant decan: Capricorn
Ascendant decan ruler: Saturn/Scorpio
Planets/Nodes placed in the Ascendant sign or decan: n.a.

Longevity: 66y 7m 26d

Releaser and kadukhudhāh. Figure is diurnal and Sun/Scorpio/10th qualifies. Sign lord Mars in his own sign rulership qualifies as the kadukhudhāh. Mars grants 66 major years. Saturn receives Mars by bound and may deduct 30 minor years yet Mars receives Saturn and appears to leave the longevity projection unchanged. Did anything happen at 66 (Mars) – 30 (Saturn) = 36 yrs net? During the time period 7-Nov-1903 to 7-Nov-1904 Curie dud suffer a miscarriage. The same year she was awarded her first Nobel Prize for physics. But she lived another 30 years.

Compare to Cole Porter where a mixed reception between the kadukhudhāh and a receiving malefic timed a horseback riding accident which crippled him for life but did not kill him.

Victor of the Chart: Mars/Scorpio

Ibn Ezra's method favors Venus over Mars; Porphyry's expanded Stage I criteria highlights both Mercury and Mars ruling 3 signifiators by sign and Mercury ruling ruling 5 significators by bound.

As described in Stage I rectification, I favor Mars/Scorpio for the victor because Mars is a delineation match to the type of chemistry she did in the laboratory. Firdaria confirm the importance of Mars which itself rules the Sun-Saturn-Venus-Mars stellium.

Manners: Jupiter-Venus
