Introduction to delineation of appearance and character in natal astrology. The following document is a hand-written analysis of **Andrei Chikatilo** made using the principles of medieval predictive astrology. The discipline of natal astrology focuses on the fate of an individual based on a horoscope cast for the moment of birth. Within natal astrology, the 1st house occupying the eastern horizon at birth describes the native: physical vitality, appearance, and character. Between the Hellenistic and Medieval eras several specialized models have been developed to assess these characteristics. They include **longevity** (vitality and length of life), **physiognomy** (form and shape of the face and body), **victor of the chart** (overall life purpose), **manners** (social conduct including ethical behavior), and **temperament** (elemental mix of fire, earth, air, and water with applications in medical astrology). Prior research has presented models and results for longevity (*A Rectification Manual: The American Presidency*, Chapter 4) and physiognomy (*Astrological Physiognomy: History and Sources* & *Astrological Physiognomy: Empirical Tests of the Leo Rising Decan*). This paper presents one of forty horoscopes chosen to populate an initial data set to investigate the victor.

Victor of the Chart. Included are two competing models for computing the victor of the chart said to be the single most powerful planet in the horoscope. According to Plato's follower Porphyry, by configuration in the natal horoscope the planet signifying the victor of the chart shows the life choice made by the soul prior to incarnation. Plato explains the details of his soul model in *The Myth of Er* found in the closing pages of his work *The Republic*. Porphyry and his peer Antiochus offer specific rules for determining the victor of the chart. The method of Antiochus/Porphyry is compared to a later method for determining the victor suggested by the Jewish Rabbi Abraham ben Meir Ibn Izra who was an active philosopher and astrologer in the 12th century. For a discussion of these two models, see the companion paper *Victor of the Chart: Testing Methods of Antiochus/Porphyry and Ibn Ezra* which serves as a key to what is presented here.

Manners. Plato was not alone among Greek philosophers in conceiving models for the soul. Aristotle's model of vegetative, sensitive, and intellective soul levels assigned respectively to the plant, animal, and human kingdoms was taken up by Ptolemy who found a correspondence between the sensitive and intellective soul and Moon and Mercury in the natal horoscope. Configuration of the Moon and Mercury, with special emphasis given to their rulers, is a second method for analyzing the soul. Ptolemy introduces this model in *Tetrabiblos III.13* "Of the Quality of the Soul". Subsequent authors refer to this model as "Significators of the Soul" or "Manners". A summary template for the Moon and Mercury is presented in the paper and will be further developed in future versions.

Andrei Chikatilo (October 16, 1936 – February 14, 1994)

Convicted of 53 murders of women and children between 1978 and 1990, Andrei Chikatilo was one of the most notorious serial killers in the history of the Soviet Union.

Born to parents who were farm workers, Chikatilo's childhood was scarred by famine created by Stalin's agricultural collectivization, WWII German bombing runs, and schoolyard bullying for his identity as the son of a father who had been captured by the Germans during military service. His childhood was also marked by chronic bedwetting, made all the worse because he shared a single bed with his parents. Shy, socially awkward, and impotent in the presence of females, Chikatilo remained uncomfortable during his adolescence years. He eventually married, produced two children, and turned his language interests into a profession teaching Russian literature. His teaching career ended abruptly in March 1981 at the age of 44 following molestation charges made by students. As it was later discovered, Chikatilo had already committed his first murder in late 1978.

Once Chikatilo began work as a factory supply clerk, his murder spree opened up. Later he stated that sexual arousal from killing and slashing his first victim, the 9-year-old girl Yelena Katotnova in 1978, was so strong the desire for repeated acts was overwhelming. He was profiled by the Russian psychiatrist Alexandre Bukhanovsky as a "necro-sadist." Bukhanovsky later became one of Russia's experts on this category of killers.

Hindered by a Communist philosophy which dismissed serial killers as a product of dysfunctional Western societies, Soviet authorities were ill-equipped to handle investigation of serial killers. In addition, what made the investigation more challenging was Chikatilo's physiological classification as a "non-secretor." For these individuals, the blood type of the actual blood itself differs from the blood type found in other bodily fluids. This anomaly allowed Chikatilo to escape notice after a September 13, 1984 arrest because the AB type found in the semen at crime scenes did not match Chikatilo's own A blood type. Following his December 12, 1984 release, he killed another twenty-one victims until his arrest on November 20, 1990. He was found guilty on October 15, 1992, sentenced to death, and died by execution to the head with a single gunshot on February 14, 1994.

Stage I. Determine the Ascendant sign

Firdaria

For the diurnal series, the murders occupy the greater part of the Saturn's Major years and the first two subperiods of Jupiter's Major years. Saturn is afflicted (retrograde and opposed Mars); Jupiter is afflicted by the same Mars-Saturn opposition but himself is stronger in essential dignities amplified by the North Node.

For the nocturnal series, the murders coincide fairly precisely with both the South Node and Major Sun period. I also note that the onset of the Major Venus Period on October 16, 1990 coincided with plans for a new police dragnet made on October 27, 1990 which caught Chikatilo shortly thereafter on November 20, 1990. South Node/Gemini is ruled by Mercury/Libra which is approaching the sunbeams which excites the nature of Mercury. Mercury/Libra ruling South Node/Gemini can be interpreted as interest in youth which causes their destruction. I also note the Sun placed in the bound of Venus, with Venus afflicted. These observations favor the nocturnal series.

Conclusion: Figure is nocturnal.

Moon

For a nocturnal figure, the Moon's range is either 27LI09 – 00SC37 or 5SC57 – 8SC59. In favor of the a.m. nocturnal birth is the Moon's placement in the bound of Mars/Libra for most of the morning hours. Mars ruling the kidney in the sign of his detriment where he delays action is a delineation match for bedwetting where urination is delayed past opportune times.

Conclusion: Moon is placed in the bound of Mars/Libra which limits the degree range to 28LI00-29LI59, or a birth time between 1:43 AM and 5:46 AM. The corresponding Ascendant range from 22LE03 to 8LI08 limits Ascendant choices to late Leo, Virgo, or early Libra.

Configuration of the Chart

Returning to findings from Firdaria analysis, what is a consistent Ascendant with most of the killings occurring during the Major Sun period and Chikatilo's arrest during the Major Venus period?

Consider for a Virgo rising figure that Sun-ruled Leo moves to the 12th house of evil spirit. Ascendant lord Mercury approaches the sunbeams but applies to the sextile of Jupiter before moving into Scorpio where he trines Saturn and eventually makes his superior conjunction with the Sun. The application to Jupiter is not favorable, as Jupiter triggers the Mars-Saturn opposition as ruler of Saturn.

As for the Major Venus period, note that Venus/Scorpio/3rd (short-term trips) rules the 9th (criminal justice system). Chikatilo was arrested following suspicious behavior at a train station.

Conclusion: Ascendant is Virgo

Stage II. Determine the Ascendant's range within 1-4 degrees

Physiognomy

Virgo is known for facial features which are drawn, reflecting the introspection capable of this detail-oriented sign. Virgo is also known for pointed chins. Both are reasonable matches to Chikatilo's face. Choices for the rising decan include Virgo (ruler Mercury/Libra), Capricorn (ruler Saturn/Pisces), and Taurus (ruler Venus/Scorpio). Neither the phlegmatic characteristics (puffy cheeks, round face) of Saturn/Pisces ruled Capricorn nor the intensity (dark eyebrows, aquiline nose) of Venus/Scorpio ruled Taurus are present. This leaves the first decan of Virgo ruled by Mercury/Libra as the physiognomy significator. The compressed ovate shape of Libra is a reasonable match to Chikatilo's facial shape.

Conclusion: Ascendant is the first 10 degrees of Virgo.

Measurements to the angles

Criminal acts are often timed by dynamic activity to the 12th house Lot of Accusation, Exile, and Injury. In this case the lot is so near the Moon's antiscion, it will be difficult to distinguish whether the Moon or the Lot is at work. I pass on this approach and move to the next best method of rectifying criminal horoscopes: transits of the Lunar Nodes which aspect either ASC/DSC or MC/IC axis on dates of arrest. Here are Chikatilo's arrest dates with corresponding transiting position of the Lunar Nodes:

13-Sep-1984. tr. North Node 00GE58'21" conj MC?
20-Nov-1990. tr. North Node 1AQ21'28" trine MC?

If correct, these measurements suggest an MC degree range of 00GE30 to 1GE30. Though I would like more measurements, I will take this degree range as a trial and proceed to check for directions. If that step fails, I can always return to Stage II rectification and check for other measurements to the angles.

Stage III. Determine the exact Degree and Minute of the Ascendant

Directions

Solar Arc Directions

In my opinion, it is the dynamic movement of the Sun and Moon setting off the Mars-Saturn opposition which sets off Chikatilo's crimes and arrest. By direct motion, the Sun or Moon can move to the conjunction of Mars and the opposition of Saturn. By converse motion, the Sun or Moon can move to form the crux of a t-square formed by the Mars-Saturn opposition. There are many permutations of these directions which can be constructed to fit life events. As such, I do not consider this rectification to be final, though it appears to be sufficiently accurate for testing the Ruler of the Chart methodology.

Direction	**Date projection – direct**	**Date projection - converse**
Moon opposed Saturn	6-Jul-1978	26-Jun-1979
Moon square Mars	15-Jan-1980	29-Jan-1981
Mars conj Moon	16-Mar-1983	**24-May-1984***
Moon square Saturn	24-Sep-1984	30-Dec-1985
Sun square Mars	17-Feb-1986	20-Jun-1987
Sun square Saturn	**23-Oct-1990***	**25-May-1992***

I have highlighted three dates in the table.

25-May-1984 marked a particularly brutal set of slayings. After Chikatilo murdered 32 year old Tatyana Petrosyan, he chased her daughter Svetlana (age 11) with a hammer until he caught up with her and bludgeoned her to death. Svetlana had witnessed Chikatilo killing her mother.

The final pair of Sun square Saturn directions form a quasi-sequence which matches design of the police dragnet on 27-Oct-1990 which led to Chikatilo's capture and the start of his jury trial on 14-Apr-1992.

Primary Directions

REG	D	Mars/Aries	P	Opposition Sun d. => Saturn (l=SA)	7-Sep-1984

First arrest, 13-Sep-1984. Note participation of Sun and Saturn in this first arrest (timed by primary direction) and the same planets involved in his second arrest (solar arc above).

REG	D	Saturn/Cancer	P	Dex. square Moon c. => Mars	19-Feb-1994

His death sentence, carried out by execution by gunshot on 14-Feb-1994. This arcus vitae suggests the Moon is the releaser and Mars, ruler of the 8th, is the empirical killer.

Additional

Moon’s Configuration: Moon separates from the Sun and is VOC, nocturnal, conjunctional.

Moon-Mercury whole sign aspect? Placed in the same sign but Moon burned by the Sun may not be capable of seeing Mercury.

Do scoring methods agree? No.

The mubtazz for the Moon is either Mercury, Venus, or Saturn. For Mercury, Saturn is the consistent scorer. Based on life affairs, necro-sadism is a Saturn-Venus affliction which for Chikatilo is correctly identified using the early Medieval mubtazz scoring method.

Model Summary (for model details see www.regulus-astrology.com/research.html)

Physiognomy

To recap the discussion from the rectification section, drawn facial features and a pointed chin are a match to the Virgo facial type. Overall shape of the face is a reasonable match to Willner's compressed ovate shape assigned to Libra. This is a match to Mercury/Libra ruling the 1st decan of Virgo. For evidence of the compressed ovate shape, see this additional image taken at younger age: (see http://en.wikipedia.org/wiki/File:Chikatiloaged22.jpg).

Longevity: 57y 3m 29d

Releaser and kadukhudhāh. Figure is nocturnal and Moon/Libra/2nd qualifies as the releaser. Participating triplicity ruler Jupiter in his own sign is the most dignified of the Moon's rulers and aspects the Moon by sextile. Jupiter grants his 79 major years as kadukhudhāh, augmented 25% by conjunction to the North Node for a gross longevity projection of 98y 9m. By square aspect, Mars deducts 15yrs and Saturn deducts 30yrs for a net projection of 53y 9mo, or 17-Jul-1990. On 27-Oct-1990 a massive operation was launched to entrap Chikatilo. He was arrested on 20-Nov-1990. Though Chikatilo's death sentence was not carried out until 19-Feb-1994, the longevity method suggests as of 17-Jul-1990 Chikatilo was functionally dead.

Victor of the Chart: Mars/Virgo

Both methods favor Mercury as VOC. As secondary contenders, Ibn Ezra's method suggests Venus or Saturn; Porphyry's expanded criteria suggest Venus or Mars. With Venus in the sign of her decline and placed in the cadent 3rd house, the choice appears between Mercury, Mars, or Saturn. Mercury plays the role of professional significator for Chikatilo; he was a school teacher of Russian language and literature and later a factory supply clerk. Comparing Mars and Saturn the choice easily goes to Mars as Mars has the strongest possible solar phase, is the in-sect malefic, and is angular in the 1st house. Saturn is completely out of sect, peregrine (though received by Jupiter), and retrograde. Choice of Mars/Virgo is a delineation match to Chikatilo's life as a serial killer with his style of slashing, stabbing, and evisceration a specific match to Mars' universal significations.

Manners: Saturn-Venus (necro-sadism)
