# Medieval Astrology Profile for Albert Einstein

File History: Initial version 7-Feb-2014; Table Updated 31-May-2016.

*Introduction to delineation of appearance and character in natal astrology*. The following document is a hand-written analysis of **Albert Einstein**, using the principles of medieval predictive astrology. The discipline of natal astrology focuses on the fate of an individual based on a horoscope cast for the moment of birth. Within natal astrology, the 1st house occupying the eastern horizon at birth describes the native: physical vitality, appearance, and character. Between the Hellenistic and Medieval eras several specialized models were developed to assess these characteristics. They include **longevity** (vitality and length of life), **physiognomy** (form and shape of the face and body), **victor of the chart** (overall life purpose), **manners** (social conduct including ethical behavior), and **temperament** (elemental mix of fire, earth, air, and water with applications in medical astrology). Prior research has presented models and results for longevity (*A Rectification Manual: The American Presidency*, Chapter 4) and physiognomy (*Astrological Physiognomy: History and Sources* & *Astrological Physiognomy: Empirical Tests of the Leo Rising Decan*).

*Victor of the Chart*. Included are two competing models for computing the victor of the chart said to be the single most powerful planet in the horoscope. According to Plato's follower Porphyry, the planet signifying the victor of the chart by configuration in the natal horoscope shows the life choice made by the soul prior to incarnation. Plato explains the details of his soul model in *The Myth of Er* found in the closing pages of *The Republic*. Porphyry and his peer Antiochus offer specific rules for determining the victor of the chart. The method of Antiochus/Porphyry is compared to a later method for determining the victor suggested by the Jewish Rabbi Abraham ben Meir ibn Ezra, a philosopher and astrologer active in the 12th century. For a discussion of these two models, see the companion paper *Victor of the Chart: Testing Methods of Antiochus/Porphyry and Ibn Ezra*, which serves as a key to what is presented here.

*Manners*. Plato was not alone among Greek philosophers in conceiving models for the soul. Aristotle's model of vegetative, sensitive, and intellective soul levels (assigned respectively to the plant, animal, and human kingdoms) was taken up by Ptolemy, who found a correspondence between the sensitive and intellective soul and Moon and Mercury in the natal horoscope. The configuration of the Moon and Mercury, with special emphasis given to their rulers, is a second method for analyzing the soul. Ptolemy introduces this model in *Tetrabiblos III.13* "Of the Quality of the Soul.*"* Subsequent authors refer to this model as the "Significators of the Soul" or "Manners." A summary template for the Moon and Mercury is presented in the paper and will be developed further in future versions.

**Albert Einstein (March 14, 1879 - April 18, 1955)**

Names like Freud, Debussy, Stravinsky, Balanchine, Picasso, Cocteau, and Chanel will always be associated with birth of the Modern Era in the early 20th Century. But as a physicist who upset the laws of Newton which had reigned for 300 years, Albert Einstein ushered in the Modern Era as no other artist, philosopher, or cultural figure could. Advances in technology, including nuclear weapons, are the direct result of Einstein's theoretical advances made between 1905 and 1915. Shortly before January 1, 2000, TIME magazine chose Einstein as the *Person of the Century*.

Einstein was born into a family with engineering interests in electricity with his father manufacturing electrical equipment based on DC current. Unfortunately AC current won the 'War of Currents' leaving his father's business bankrupt. Nevertheless, Einstein's parents had designs on their son as a future engineer (which would also be the occupation of Einstein's own son Hans Albert). Einstein was a successful student, achieving strong grades in math and science subjects though he rebelled against rote learning common to the German Gymnasium system of the era. He eventually made his way to the Zurich Polytechnic in order to qualify as a teacher of math and science subjects. Initial years were rocky with a string of substitute teaching jobs at various schools in Switzerland. Not until he was hired as a physicist to review inventions by the Swiss Patent Office did Einstein's professional life stabilize. Though a patent clerk underemployed Einstein's talents, the relatively mundane and limited work requirements freed his mind to engage in thought experiments and other methods of deductive logic which culminated with four groundbreaking papers written between March and June 1905. The topics included describing light as energy quanta or photons (for which he would win the Nobel Prize in 1921), how to measure the size of sugar molecules which would demonstrate the existence of atoms beyond a doubt, a Special Theory of Relativity, and the famous equation $E = mc^2$. The General Theory of Relativity came later in 1915 and was proven by others by observations made during a total solar eclipse which demonstrated the displacement or curving of light beams from distant stars as they passed around the Sun because of the Sun's gravitational force. The observed displacement was in exact accordance with predictions made by the General Theory of Relativity. Announcement of these results in 1919 made Einstein the first global scientific celebrity in the history of mankind.

Beyond the General Theory of Relativity, Einstein made few additional breakthroughs within the field of physics during his lifetime though physicists do regard prediction of the Bose-Einstein condensate (1924-1925) and the Einstein-Podolsky-Rosen Paradox of 1935 significant contributions. With the rise of Nazism, Einstein left Germany in December 1932 one month before Hitler became Chancellor. Though initially wooed by Caltech, he took a position at Princeton's Institute for Advanced Study where he attempted, but was unsuccessful, in developing a Unified Field Theory.

Einstein was never afraid to speak his mind and cared little about the risk of challenging authority. A devoted pacifist, he abhorred Germany's jubilance on the nation's entry to WWI and the later rise of Nazism - whose scientists rejected his General Theory of Relativity. Nevertheless with the threat of Hitler, Einstein wrote to FDR in 1939 suggesting the United States develop the atomic bomb in a perceived arms race against similar research efforts by the Nazis. In an ironic twist, Einstein made a sufficient number of anti-government statements that his FBI file prevented a security clearance his participation in the Manhattan Project. Though not involved in its development, Einstein is still considered 'father of the bomb.'

## Rectification

Available Birth Data

Astrodatabank reports an AA-rated birth time of 11:30 AM with an Ascendant of 11CA39. Photo image of actual birth certificate included on Astrodatabank's website. The proposed rectification is 25 minutes earlier with the 7th degree of Cancer rising.

Proposed Rectification

Alfred Einstein
14-Mar-1879
11:05:45 AM
LMT -00:40:00
Ulm Germany
10e00, 48n24
ASC 6CA31'57"

Stage I. Determine the Ascendant sign

Smooth skin on the face (Cancer) and wild lengthy hair (Moon/Sagittarius) are both consistent with a Cancer Ascendant. Einstein tended to gain weight over the years with his face becoming puffy. This is symptomatic of overindulgence with food and drink causing liver problems. While liver problems are not reported for Einstein, heart problems are consistent with (but by no means a definite result of) Moon/Sagittarius placed in the 6th of illness. See also Judy Garland for the identical placement (who suffered from documented liver problems).

Stage II. Determine the Ascendant's range within 1-4 degrees

*Physiognomy*

The AA-rated birth time places the 2nd decan of Cancer on the Ascendant. If so, that would make Scorpio the rising decan with ruler Mars/Capricorn giving a more bony constitution and Marine-like appearance. Moving the Ascendant to the 1st decan of Cancer is a better fit with observations listed in Stage I rectification.

*Sensitive Degrees*

For marriage to his first wife Mileva on 6-Jan-1903:
trVenus 7CA00 conj ASC
dsa North Node 7CP36’51” conj DSC

For detonation of the atomic bomb over Hiroshima on 6-Aug-1945:
dsa. North Node 6AR24’42” square ASC-DSC axis
trNorth Node 7CA17’18”conj ASC

In my work, direction or transit of the Nodes to the 1st/7th axis for dates of engagement or marriage is one of the more reliable rectification measurements because they connect two different people in the public sphere. Public events, in general, also respond extremely well to dynamic activity of Nodes to the angles. For Hiroshima, Einstein was nicknamed ‘Father of the bomb’ because of his famous equation E=mc2. This was one of Einstein’s most significant life events though his participation was indirect.

Conclusion: Ascendant is in the 7th or 8th degree of Cancer.

<u>Stage III. Determine the exact Degree and Minute of the Ascendant</u>

*Primary Directions*

| | | | | | |
|---|---|---|---|---|---|
| PT | D | Jupiter/Aries | P | sin sextile North Node d. => MC | 15-Jun-1902 |

Offered post at Swiss patent office, 16-Jun-1902.

| | | | | | |
|---|---|---|---|---|---|
| PT | D | Venus/Pisces | P | MC c. => Saturn (l=SA) | 13-Oct-1902 |

Death of father, 10-Oct-1902.

| | | | | | |
|---|---|---|---|---|---|
| REG | D | Mars/Sagittarius | P | dex square Lot of Fortune c. => North Node | 9-Nov-1919 |

Eclipse observations supported General Theory of Relativity. These observations were reported to the Royal Society in London on 6-Nov-1919 and flooded the world press on 7-Nov-1919. This publicity was the most important publicity of Einstein’s entire career which made him the first scientific media superstar of the 20th century.

| | | | | | |
|---|---|---|---|---|---|
| PT | D | Jupiter/Sagittarius | P | dex square MC c. => North Node | 3-Aug-1939 |

Letter to FDR suggesting construction of atomic bomb against Germany, 2-Aug-1939.

| | | | | | |
|---|---|---|---|---|---|
| PT | D | Jupiter/Aries | P | Saturn c. => ASC | 4-May-1945 |

Successful Alamogordo test of Atomic Bomb, 7-May-1945. I suggest the atom smashing component of nuclear fission is consistent with Saturn (partition/split) and Aries (fire).

| | | | | | |
|---|---|---|---|---|---|
| PT | D | Mars/Pisces | P | Sun c. => ASC | 13-May-1950 |

Hebrew University announced Einstein will present an original copy of his theory of general relativity to the University, 11-May-1950.

*Final Years/Death*

I propose that the Sun's direction to the 7th cusp is Einstein's arcus vitae. These set of directions represent another example of the Solar Arc - Primary Directions proposition I first published in *A Rectification Manual* (p. 139).

For Einstein, discovery of an aneurysm of the abdominal aorta in December 1948 effectively made him a dead man. This action was timed by a primary direction.

The aneurysm burst on 13-Apr-1955. Einstein died on 18-Apr-1955. Sun is directed to the DSC by converse solar arc direction for the 13th. This is the measurement I used to lock down the rectification.

*By Primary Direction*

| | | | | | |
|---|---|---|---|---|---|
| REG | D | Mercury/Capricorn | P | DSC c. => Sun | 28-Nov-1948 |

Learned of existence of aneurysm, December 1948.

*By Solar Arc Direction*

<u>13-Apr-1955</u>. *csa Sun opposed ASC*.
Aneurysm burst, exact date.

Single point: assigns 1 point for each essential dignity
Early medieval: sign 5, exaltation 4, bound 3, primary triplicity lord 2, decan 1. Used by al-Kindī and Māshā’allāh.
Late medieval: sign 5, exaltation 4, triplicity lords (all) 3, bound 2, decan 1. Used by Schoener; taught by Zoller.

Fixed Stars from Janus 4.3 software. Criteria: conjunction within 2 degrees longitude.

## Additional

Moon’s Configuration: Moon separates from Saturn and applies to Venus, diurnal, preventioanl.

Moon-Mercury whole sign aspect? Yes. Moon - Mercury in trine aspect.

Do scoring methods agree? Yes. Significators of manners are **Jupiter-Mars**.

## Model Summary

**(for model details see www.regulus-astrology.com/research.html)**

Physiognomy

Ascendant sign: Cancer
Ascendant sign ruler: Moon/Sagittarius
Ascendant decan: Cancer
Ascendant decan ruler: Moon/Sagittarius
Planets/Nodes placed in the Ascendant sign or decan:

Longevity: 76y 1m 4d

*Releaser and kadukhudhāh*. Figure is diurnal and Sun in the 9th/10th (whole signs/quadrant houses) qualifies. Bound lord Mars is in the sign of his exaltation, receives the Sun by sextile, and is placed in the angular 7th house. Mars grants 66 major years. Square aspect from Venus may add some years though Venus receives Mars only by diurnal triplicity.

Einstein's fatal aneurysm was discovered in December 1978 at the age of 69 8 ½ months. He died at the age of 76. The diagnosis of the aneurysm is a reasonable match to Mars' 66 major years as a longevity estimate.

Manners: Jupiter-Mars

Victor of the Chart: Mercury/Aries

Both Ibn Ezra's method identifies Venus and Jupiter as candidates. Porphyry's Stage I criteria adds Mercury and Mars. Porphyry's Stage II tips the odds in favor of Jupiter. Choosing Jupiter/Aquarius would identify Einstein as a 'scientific humanitarian' which indeed was the role he played in later years. But I suggest it is not at the root of Einstein's genius. Nor is Venus/Aries which identified his high sexual appetite and numerous affairs. As a theorist, Mercury/Aries is the logical choice as victor. In Mercury's favor is his fast speed and heliacal rising phase as an evening star. Though afflicted by the conjunction to Saturn, Mercury is nonetheless received by the very powerful Mars/Capricorn which is in the sign of exaltation (approaching its exaltation degree) and angular.

As further evidence of Mercury as victor, consider Einstein's 1905 solar return for the year when his thought experiments culminated with his four famous papers which would change the field of physics forever:

- For 1905, the Ascendant moves to 5VI31 by annual profection, a 3rd house year.
- Lord of the Year is Mercury.
- Moon separates from the trine of Saturn and applies to the square of Mercury.
- Mercury/Pisces (water sign) is consistent with the type of though experiments Einstein conducted which drove a top-down, or deductive, logical thinking process.
- Solar Return Mercury/Pisces is conjunct natal Lot of Fortune.
- Moon-Mercury-Sun-Nodes are angular.
- As for Jupiter, see he is cadent in the 9th. Jupiter did not 'make' Einstein in 1905.
