

Medieval Astrology Profile for Lorenzo Niles Fowler

V.1. 7-Feb-2021. 11:56:10 PM, ASC 29PI07'11"

Introduction to delineation of appearance and character in natal astrology. The following document is a hand-written analysis of **Lorenzo Niles Fowler**, using the principles of medieval predictive astrology. The discipline of natal astrology focuses on the fate of an individual based on a horoscope cast for the moment of birth. Within natal astrology, the 1st house occupying the eastern horizon at birth describes the native: physical vitality, appearance, and character. Between the Hellenistic and Medieval eras several specialized models were developed to assess these characteristics. They include **longevity** (vitality and length of life), **physiognomy** (form and shape of the face and body), **victor of the chart** (overall life purpose), **manners** (social conduct including ethical behavior), and **temperament** (elemental mix of fire, earth, air, and water with applications in medical astrology). Prior research has presented models and results for longevity (*A Rectification Manual: The American Presidency*, Chapter 4) and physiognomy (*Astrological Physiognomy: History and Sources & Astrological Physiognomy: Empirical Tests of the Leo Rising Decan*).

Victor of the Chart. Included are two competing models for computing the victor of the chart said to be the single most powerful planet in the horoscope. According to Plato's follower Porphyry, by configuration in the natal horoscope the planet signifying the victor of the chart shows the life choice made by the soul prior to incarnation. Plato explains the details of his soul model in *The Myth of Er* found in the closing pages of his work *The Republic*. Porphyry and his peer Antiochus offer specific rules for determining the victor of the chart. The method of Antiochus/Porphyry is compared to a later method for determining the victor suggested by the Jewish Rabbi Abraham ben Meir ibn Ezra, a philosopher and astrologer active in the 12th century. For a discussion of these two models, see the companion paper *Victor of the Chart: Testing Methods of Antiochus/Porphyry and Ibn Ezra*, which serves as a key to what is presented here.

Manners. Plato was not alone among Greek philosophers in conceiving models for the soul. Aristotle's model of vegetative, sensitive, and intellective soul levels (assigned respectively to the plant, animal, and human kingdoms) was taken up by Ptolemy, who found a correspondence between the sensitive and intellective soul and Moon and Mercury in the natal horoscope. Configuration of the Moon and Mercury, with special emphasis given to their rulers, is a second method for analyzing the soul. Ptolemy introduces this model in *Tetrabiblos III.13* "Of the Quality of the Soul." Subsequent authors refer to this model as "Significators of the Soul" or "Manners." A summary template for the Moon and Mercury is presented in the paper and will be further developed in future versions.

Regulus USA National Horoscope – Jupiter/Aries Ascendant Distribution

Rectification

Available Birth Data

Astrodatbank reports an A-rated from memory birth time of 12:05 AM with an Ascendant of 3AR08. The proposed rectification is slightly earlier. Given the A-rated birth time features an Ascendant degree in the bound of Jupiter/Aries to which I have assigned the subject of phrenology (Jupiter = teaching; Aries = head), I am reluctant to move the Ascendant degree back. Yet the few major life events for which we have exact dates feature significant transits in the 30th degree of Pisces. The Lot of Spirit remains in Aries for both ADB and rectified times which may suffice for the linkage to phrenology.

Proposed Rectification

ASC 29PI07'11"

Stage I. Determine the Ascendant sign

Sensitive Degrees

Of the six signs of short ascension, Pisces and Aries rise the fastest which makes rectification more challenging given how fast the Ascendant degree changes. I depart from my usual three stage process by using sensitive degree analysis (usually reserved for Stage II) as a Stage I tool to confirm the Ascendant sign. The following measurements strongly suggest the Ascendant degree is in the 30th degree of Pisces.

Date	Event	Measurement
13-Aug-1819	Death of mother	dsa South Node 29PI07 trSaturn 29PI56-rx
19-Sep-1844	Marriage to Lydia Folger	trJupiter 29PI13
3-Nov-1855	Life Illustrated debut	trSaturn 29GE36-rx
26-Jan-1879	Death of wife Lydia	trSaturn 29PI00

Based on these measurements, I suggest that Pisces is the rising sign, not Aries.

Configuration of the Chart

Pisces rising places the Venus-Mercury-Jupiter/Gemini = Saturn/Sagittarius configuration together with the Nodes in the angles.

Stage II. Determine the Ascendant's range within 1-4 degrees

Omit

Stage III. Determine the exact Degree and Minute of the Ascendant

Solar Arc Directions

KEY – Mubtazz Scoring

Single point: assigns 1 point for each essential dignity

Early medieval: sign 5, exaltation 4, bound 3, primary triplicity lord 2, decan 1. Used by al-Kindī and Māshā'allāh.

Late medieval: sign 4, exaltation 4, triplicity lords (all) 3, bound 2, decan 1. Used by Schoener; taught by Zoller.

Fixed Stars from Janus 4.3 software. Criteria: conjunction within 2 degrees longitude.

Additional

Moon's Configuration: Moon separates from Mars and is VOC, nocturnal, conjunct.

Moon-Mercury whole sign aspect? No. Moon and Mercury are inconjunct.

Do scoring methods agree? Saturn-Mercury (sign-based); Saturn-Jupiter (bound-based).

Model Summary

(for model details see www.regulus-astrology.com/research.html)

Physiognomy

Ascendant sign: Pisces

Ascendant sign ruler: Jupiter/Gemini

Ascendant decan: Scorpio

Ascendant decan ruler: Mars/Scorpio-Rx

Planets/Nodes placed in the Ascendant sign or decan: S.Node in Ascendant sign; Mars in sign of rising decan.

Longevity: 85y 2m 9d

Releaser and kadukhudhāh. Figure is nocturnal and Moon is preferred and allowed in the 5th. Yet the Moon's only aspect is the separation from Mars which is the Moon's nocturnal triplicity ruler. She does not aspect Saturn which is the Moon's bound lord. Two possibilities:

(1) If the Moon/Cancer functions as both releaser and kadukhudhah, then the Moon grants 108 major years less Mars' 15 minor years by trine aspect with Mars receiving by triplicity. Net is 93 yrs which is 8 years too long.

(2) Take Saturn/Sagittarius-rx as victor and begin with Saturn's 57 minor years. Opposition from Jupiter by reception adds Jupiter's 12 minor years taking longevity to 69yrs. Neither Mercury or Venus receive Saturn so they should not add years. This projection is too short.

There is a third possibility if we reject Moon/Cancer as releaser because even though she is in Cancer there is no aspect to a ruler save Mars. Suppose L.Fortune/1st is the releaser. Bound and exaltation lord Venus aspects by square and grants 82 major years. Mercury and Jupiter add 20 and 12 years respectively while Saturn deducts 30. Net projection is 84 years which is the most accurate projection.

Victor of the Chart: Saturn/Sagittarius-rx

Porphry's Stage I criteria ranks Saturn well above all other planetary choices for the victor. Within Stage II criteria, Saturn is just past achronycal rising, still very bright, and angular in the 10th. Saturn is also at the bendings of the Lunar Nodes with North Node 10th from Saturn. These conditions all favor Saturn as victor. If so, then Saturn/Sagittarius-rx acts like Saturn/Gemini making Lorenzo Fowler a 'just the facts, ma'am' type of analytical personality capable of producing thousands of methodical phrenological reports over many decades.

Manners: Saturn-Mercury (sign-based); Saturn-Jupiter (bound-based).
